About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee's management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home's Residents' Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Behaviour Management and Dementia Care

RHRA Inspector Findings

A review of a resident's record who was identified as having responsive behaviours indicated that the Licensee had not developed a behaviour management strategy that included techniques and strategies to prevent and address the resident's behaviours. The Licensee failed to implement their behaviour management policy fully.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #2: Emergency Plan

RHRA Inspector Findings

The inspector reviewed the Licensee's records of testing for their emergency plans and found that the testing for situations involving the loss of essential services, a missing resident, violent outbursts, and medical emergencies had not been completed. Staff training on the homes emergency codes was completed but the testing of their procedures was not completed. The Licensee's emergency plan also does not include epidemics and pandemics. The Licensee failed to ensure that testing was done annually as required and that the emergency plan includes epidemics and pandemics.

Outcome

The Licensee submitted a plan to achieve compliance by Fri May 19 2023. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #3: Infection Prevention and Control**RHRA Inspector Findings**

Based on observations during the inspection, the Inspector found that the Licensee failed to fully follow the Chief Medical Officer of Health and the Ministry of Health's recommendations outlined in the updated COVID-19 Guidance as not all required individuals in the home wore medical/surgical masks; or wore them properly, as required.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #4: Resident Record, Assessment, Plan of Care**RHRA Inspector Findings**

The Inspector reviewed a sample of resident care files and found that 2 residents did not have their plan of care updated as their care needs changed. Two residents on admission administered their own medications and this care service was taken over by the Licensee and the residents' plan of care was not updated. Secondly, for those residents who are diabetic or have diabetic needs, their specific dietary needs and/or information or description of what their diabetic diets consist of were not documented in their respective plans of care. The Licensee failed to update plans of care and ensure documentation in the residents' plans of care was in accordance with the legislation.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #5: Staff Training**RHRA Inspector Findings**

The inspector reviewed medication administration training for the UCP's who administer medications and found that 2 staff members had not been trained in medication administration. The Licensee failed to ensure that staff were trained as required.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
