About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee's management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the RHA. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the RHA.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the RHA. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home's Residents' Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Emergency Plan

RHRA Inspector Findings

There is a requirement under the Retirement Homes Act that resources, supplies, and equipment vital for the emergency response be set aside and readily available at the retirement home; and annual testing of all such resources, supplies, and equipment takes place to ensure that they are in working order.

There is a further requirement that the Licensee must annually test their emergency systems in the areas of loss of essential services, missing residents, and medical emergencies and must biannually complete a full evacuation of the home.

The inspector discovered that although the home had set aside all reasonable supplies, they were not tested to ensure they were in working order. Furthermore, the home had not completed the annual testing of the emergency plan in the identified areas. The Licensee failed to ensure that testing of the supplies and emergency plan was completed as required

Outcome

The Licensee must take corrective action to achieve compliance.

Focus Area #2: Resident Record, Assessment, Plan of Care

RHRA Inspector Findings

As part of the routine inspection, the inspector reviewed a sample of residents' plan of care. There is a requirement under the Retirement Homes Act that resident plans of care be updated as care needs change or at the minimum of every 6 months. The inspector found that not all of the plans were updated at the time the residents' care needs changed or every six months. The Licensee failed to ensure the plans revise and updated in compliance with the legislation.

Outcome

The Licensee must take corrective action to achieve compliance.

Focus Area #3: Staff Training

RHRA Inspector Findings

The inspector reviewed a sample of training records in the areas of zero tolerance of abuse, Bill of Rights, Infection control, Whistle Blower protection, PASDs, fire prevention and safety, complaints, and behaviour management. The inspector reviewed not only records for staff recently hired to determine compliance with orientation training, but also a sample of training records for those hired prior to 2022 to determine compliance with annual training in these areas.

The inspector found that the orientation training for staff was not completed for fire safety for all staff reviewed and that one of the staff files reviewed had not completed any orientation training the reviewed areas.

For the annual training files reviewed, not all of the staff files sampled had completed training in 2021 or 2022 in the reviewed training areas.

The home was not able to determine that orientation and annual training was being completed in alignment with the regulations.

Outcome

The Licensee must take corrective action to achieve compliance.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
