License Number: S0089		

About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee's management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the RHA. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the RHA.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the RHA. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home's Residents' Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Abuse and Neglect

RHRA Inspector Findings

While conducting this inspection, the inspector made a finding unrelated to the purpose of the inspection. The inspector found evidence through documentation in the home and interviews with staff that an incident of resident-to-resident abuse with injury had occurred and had not been reported to the RHRA. Additionally, the police were not notified, as per their policy. Furthermore, the home's abuse policy failed to include training related to the relationship between power imbalances between staff and residents and the potential for abuse and neglect by those in a position of trust, power and responsibility for resident care. The Licensee failed to ensure that an incident of abuse was reported as required and the homes abuse policy met the legislative requirements.

Outcome

The Licensee must take corrective action to achieve compliance.

Focus Area #2: Emergency Plan

RHRA Inspector Findings

The inspector requested to review the home's Emergency Response Plan and staff were unable to provide a copy to the inspector for review. The Licensee was unable to provide evidence of testing of the emergency plan, testing of missing resident, violent outburst, medical emergency, loss of essential service, pandemics and an evacuation. Additionally, the home was unable to show the inspector emergency supplies and resources readily available in the event of an emergency. Furthermore, the Licensee failed to produce evidence of community agreements for shelter and transportation. The Licensee failed to ensure the requirements for an Emergency Response Plan and testing was completed as required.

Outcome

The Licensee must take corrective action to achieve compliance.

Focus Area #3: Infection Prevention and Control

RHRA Inspector Findings

The inspector observed staff and visitors not wearing a mask, while working in close proximity of residents and other staff. The Licensee failed to ensure all staff followed the Ontario Chief Medical Officer of Health's requirements.

Outcome

At the time of the inspection, the Licensee was not in compliance. The home has since taken corrective action to achieve compliance.

Focus Area #4: Resident Record, Assessment, Plan of Care

RHRA Inspector Findings

The inspector reviewed a sample of resident care files and found that 3 residents did not have their plans of care approved appropriately, as there was no evidence that the plans had been approved by the residents or their substitute decision makers. The Licensee failed to ensure that all resident plans of care had been approved as required.

Outcome

The Licensee must take corrective action to achieve compliance.

Focus Area #5: Staff Training

RHRA Inspector Findings

The inspector reviewed a sample of staff training records and found that 2 staff members had not been trained on the Licensee's infection prevention and control program and complaints, upon hire, and 1 staff member had not been trained in the homes zero tolerance to abuse policy and PASDs. Additionally, the Licensee failed to produce records of annual training for 3 staff. The Licensee failed to ensure that staff were trained as required.

Outcome

The Licensee must take corrective action to achieve compliance.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
