

FINAL INSPECTION REPORT
Under the Retirement Homes Act, 2010

Inspection Information

Date of Inspection: October 5, 2023

Name of Inspector: Melissa Meikle

Inspection Type: Routine Inspection

Licensee: ACC-002774 - 1700350 Ontario Ltd.

Retirement Home: The Walford Timmins

License Number: N0170

About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee's management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home's Residents' Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Complaints

RHRA Inspector Findings

The inspector reviewed the Licensee's complaints log and noted that a recent complaint did not have compliant written record. Specifically, the record of the complaint did not include the type of action taken to resolve the complaint and the final resolution. The Licensee failed to ensure that their written record of a complaint included all the required elements.

Outcome

The Licensee must take corrective action to achieve compliance.

Focus Area #2: Emergency Plan

RHRA Inspector Findings

The inspector reviewed the Licensee's records of testing for their emergency plans and found that there is no record of testing for situations involving the loss of essential services, medical emergency, epidemic and pandemic procedures, violent outburst and a missing resident. The Licensee failed to ensure that testing was done annually as required. Furthermore, there was no evidence of a full evacuation being completed at least every two years.

Outcome

The Licensee provided information indicating that corrective action was being taken, however, further action must be taken to achieve compliance with all areas outlined in the finding. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #3: Maintenance**RHRA Inspector Findings**

While conducting this inspection the inspector observed hazardous substances unattended and confirmed that substances were not secured while accessible to residents. The Licensee failed to ensure that that all hazardous substances used by staff of the home are kept inaccessible to residents at all times as prescribed.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
