#### About Responsive Inspections

A responsive inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. A responsive inspection is conducted when RHRA receives information that the licensee may have failed to meet the standards of the *Retirement Homes Act, 2010* or its regulations (the “*RHA*”). An inspection being conducted does not imply that an allegation is substantiated or that a contravention of the *RHA* has occurred. A licensee is required to report to RHRA if they suspect harm or risk of harm to a resident. During a responsive inspection, an RHRA inspector may observe the operations of the home, interview relevant individuals, review records and other documentation, and determine whether the licensee’s management and staff have followed mandatory policies and practices designed to protect the welfare of residents.

Following a responsive inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home’s Residents’ Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If there is a serious incident or the licensee repeatedly does not meet the required standards, RHRA may take further action.

#### Concern(s)

*During a responsive inspection, an inspector will focus primarily on the concern(s) which prompted the*

*inspection and may take various actions to determine whether the licensee is compliant with the RHA in relation to the concern(s). Any findings of non-compliance identified in relation to these concerns are listed below.*

**Concern #1: CON-9251-Medication Administration**

**RHRA Inspector Findings**

A report was made to RHRA regarding medication administration. As part of the inspection, in response to the allegation, the inspector reviewed the licensee's policy, medication administration records, observed a medication pass, reviewed staff training records, and interviewed relevant staff. The inspector found that staff were trained in medication administration but there was no evidence the home had a member of a college supervising medication administration in the home. The Licensee failed to ensure a member of a College, as defined in the Regulated Health Professions Act, supervised medication administration.

**Outcome**

The Licensee must take corrective action to achieve compliance.

**Concern #2: CON-9252-Improper or Incompetent Treatment or Care**

**RHRA Inspector Findings**

A report was made to RHRA regarding suspected improper care of a resident. As part of the inspection in response to the report, the inspector reviewed records relating to the resident, and interviewed both the resident and their substitute decision maker. The inspector confirmed that the Licensee failed to ensure that the resident who had a decline in their health had their plan of care updated as their care needs changed.

**Outcome**

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

**Additional Findings**

*During a responsive inspection, an inspector may observe areas of non-compliance that are not related to the concern(s) which prompted the inspection. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.*

**Additional Finding#1: CON-1113-Emergency Plan**

**RHRA Inspector Findings**

While conducting this inspection, the Inspector followed up on areas of previous non-compliance relating to emergency plans and procedures. The Inspector reviewed related documents and interviewed staff and again found several areas of non-compliance. Specifically, the Licensee failed to ensure arrangements for accommodation and transportation were in place with community partners involved in responding to emergencies at the home and failed to ensure testing for situations involving the loss of essential services, missing residents, and the Licensee's Pandemic and Epidemic Plan.

**Outcome**

The Licensee provided information indicating that corrective action was being taken, however, further action must be taken to achieve compliance with all areas outlined in the finding. RHRA to confirm compliance by following up with the Licensee or by inspection.
