About Responsive Inspections

A responsive inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. A responsive inspection is conducted when RHRA receives information that the licensee may have failed to meet the standards of the *Retirement Homes Act, 2010* or its regulations (the “*RHA*”). An inspection being conducted does not imply that an allegation is substantiated or that a contravention of the *RHA* has occurred. A licensee is required to report to RHRA if they suspect harm or risk of harm to a resident. During a responsive inspection, an RHRA inspector may observe the operations of the home, interview relevant individuals, review records and other documentation, and determine whether the licensee’s management and staff have followed mandatory policies and practices designed to protect the welfare of residents.

Following a responsive inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home’s Residents’ Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If there is a serious incident or the licensee repeatedly does not meet the required standards, RHRA may take further action.

Concern(s)

During a responsive inspection, an inspector will focus primarily on the concern(s) which prompted the inspection and may take various actions to determine whether the licensee is compliant with the RHA in relation to the concern(s). Any findings of non-compliance identified in relation to these concerns are listed below.

Concern #1:**RHRA Inspector Findings**

While conducting this inspection, the inspector made a finding unrelated to the purpose of the inspection. The inspector found evidence, through documentation in a resident's progress notes, that an incident of sexual abuse of another resident had occurred and had not been reported to the RHRA. The Licensee failed to ensure that an alleged incident of abuse was reported, as required.

Outcome

The Licensee submitted a plan to achieve compliance by Fri Apr 11, 2025. RHRA to confirm compliance by following up with the Licensee or by inspection.

Concern #2:**RHRA Inspector Findings**

The inspector reviewed the Licensee's records of testing for their emergency plans. The evidence demonstrated that no annual testing had been completed for the following areas: loss of essential services, violent outbursts, and responding to epidemics and pandemics. There was also no evidence that a planned full evacuation had been done in the past two years. The Licensee failed to ensure that emergency plan testing was completed, as required.

Outcome

The Licensee submitted a plan to achieve compliance by Fri May 30, 2025. RHRA to confirm compliance by following up with the Licensee or by inspection.

Concern #3:**RHRA Inspector Findings**

The inspector reviewed a sample of staff training records. The evidence showed that three of four staff members who had been recently hired by the Home failed to complete some or all of the required training prior to commencing to work in the home, as prescribed. The Licensee failed to ensure that staff were trained as required.

Outcome

The Licensee submitted a plan to achieve compliance by Fri May 02, 2025. RHRA to confirm compliance by following up with the Licensee or by inspection.

Additional Findings

During a responsive inspection, an inspector may observe areas of non-compliance that are not related to the concern(s) which prompted the inspection. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
