About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee's management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home's Residents' Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Emergency Plan

RHRA Inspector Findings

The inspector reviewed the home's emergency testing as part of a routine inspection. There is a requirement that the following emergency response areas are tested annually: missing resident, loss of essential service, violent outburst, medical emergency, and pandemic. On the date of the inspection the licensee was unable to produce testing of the emergency plan as prescribed.

Outcome

The Licensee has demonstrated it has taken corrective action to achieve compliance.

Focus Area #2: Medications**RHRA Inspector Findings**

There is a requirement that an individual administering a drug document the date and time the drug was administered, the amount, and the route. The inspector found that the home documented that they had administered a drug when they had not. The licensee failed to prepare a written record that a drug or other substance was administered as prescribed.

Outcome

The Licensee must take corrective action to achieve compliance.

Focus Area #3: Staff Training**RHRA Inspector Findings**

The Inspector reviewed a sample of staff training records and found that four staff had not completed the listed required annual training in the prescribed timeframe. The Licensee failed to ensure that staff were trained as required.

Outcome

At the time of the inspection, the Licensee was not in compliance. The home has since taken corrective action to achieve compliance.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
