About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee's management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home's Residents' Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Abuse and Neglect

RHRA Inspector Findings

As part of the routine inspection, the inspector reviewed the Licensee's policies related to Zero Tolerance of Abuse and Neglect and found the policy did not contain an explanation of the prohibition on borrowing, receiving or holding a resident's money or other property, as set out in legislation. The Licensee's policy was not in compliance with legislation.

Outcome

The Licensee must take corrective action to achieve compliance.

Focus Area #2: Emergency Plan**RHRA Inspector Findings**

During the routine inspection, the inspector reviewed the home's emergency resource supplies and equipment vital for emergency response and found that the testing of all such resources, supplies and equipment was not completed in full. The Licensee failed to ensure that testing of resources, supplies, and equipment vital for an emergency response was done as required.

Outcome

The Licensee has demonstrated it has taken corrective action to achieve compliance.

Focus Area #3: Medications**RHRA Inspector Findings**

As part of the routine inspection, the inspector reviewed the Licensee's medication administration processes and found the Licensee failed to ensure there are written records that drugs were prescribed for a resident by a person who is authorized to prescribe a drug. The Licensee failed to ensure compliance with legislation regarding medication administration.

Outcome

The Licensee provided information indicating that corrective action was being taken, however, further action must be taken to achieve compliance with all areas outlined in the finding. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #4: Staff Training**RHRA Inspector Findings**

As part of the routine inspection, the inspector reviewed a sample of orientation training records in the areas of zero tolerance of abuse, resident bill of rights, infection control, whistle blower protection, personal assistance services devices, fire prevention and safety, emergency plan, complaints, evacuation plan, and injury prevention. The Licensee was not able to demonstrate that orientation training was completed for two staff as required.

Outcome

The Licensee provided information indicating that corrective action was being taken, however, further action must be taken to achieve compliance with all areas outlined in the finding. RHRA to confirm compliance by following up with the Licensee or by inspection.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from

previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
