About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee's management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home's Residents' Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Behaviour Management

RHRA Inspector Findings

The inspector reviewed the Plan of Care for a resident who is reported to constantly exhibit behavioral issues and found that the Home had not documented strategies to address his behavior. The Licensee failed to develop and implement strategies for interventions to prevent and address resident behaviours that pose a risk to the resident or others in the home.

Outcome

The Licensee has demonstrated it has taken corrective action to achieve compliance.

Focus Area #2: Complaints**RHRA Inspector Findings**

The inspector reviewed the Licensee's complaints log and noted that it had not been updated since 2023, despite education being provided during the previous inspection. Specifically, the Home did not maintain compliant written records. The records of complaints did not include the dates on which responses were provided to the complainant, descriptions of the responses, or any subsequent responses from the complainant. Additionally, the written record is not being reviewed and analyzed for trends at least quarterly. The Licensee failed to ensure that complaints were properly documented and that the written record of each complaint included all required elements and that the complaints log is reviewed and analyzed for trends at least quarterly, and that the results of such reviews are used to determine necessary improvements in the retirement home.

Outcome

The Licensee provided information indicating that corrective action was being taken, however, further action must be taken to achieve compliance with all areas outlined in the finding. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #3: Emergency Plan**RHRA Inspector Findings**

The inspector reviewed the Licensee's records of emergency plan testing and found that testing for epidemic/pandemic situations and for a missing resident had not been completed since 2024. The Licensee failed to ensure that these tests were conducted annually as required.

Outcome

The Licensee has demonstrated it has taken corrective action to achieve compliance.

Focus Area #4: Resident Record, Assessment, Plan of Care**RHRA Inspector Findings**

The inspector reviewed a sample of resident care files and found that one resident had not been reassessed, nor was their plan of care reviewed and revised despite noted changes in the residents' care needs, there was no documented review or update made to the residents' plan of care to reflect those changes. The licensee failed to ensure that residents were reassessed and that their plan of care was reviewed and revised at least every six months, as well as when the resident's care needs changed, as required.

Outcome

The Licensee has demonstrated it has taken corrective action to achieve compliance.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
