About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee's management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home's Residents' Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Complaints

RHRA Inspector Findings

During the inspection, the inspector reviewed the home's records of complaints and concerns. It is required that these records be reviewed at least quarterly and analyzed for trends. The inspection revealed that the licensee had not completed the required quarterly analyses for the past two quarters.

Outcome

At the time of the inspection, the Licensee was not in compliance. The home has since taken corrective action to achieve compliance.

Focus Area #2: Emergency Plan**RHRA Inspector Findings**

The inspector reviewed the licensee's records of emergency plan testing and found that tests for scenarios involving the loss of essential services, a missing resident, and pandemic or endemic situations had not been conducted since 2024. The licensee failed to ensure that these tests were completed annually, as required. In addition, the licensee did not complete the planned building evacuation every two years as required ; the last evacuation drill was conducted in 2022.

Outcome

The Licensee submitted a plan to achieve compliance by Wed Jan 21 2026. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #3: Resident Record, Assessment, Plan of Care**RHRA Inspector Findings**

During the inspection, the inspector reviewed residents' plans of care. It is required that each plan of care be reviewed and revised at least once every six months. The inspection found that one resident's plan of care had not been revised within the prescribed timeframe. A review of a sample of resident care files also revealed that four residents' plans of care had not been appropriately approved, as there was no evidence of approval by the residents or their substitute decision-makers. The licensee failed to ensure that all resident plans of care were approved as required. In addition, the inspector noted that interdisciplinary care conferences had not been completed for two residents with identified dementia care needs.

Outcome

The Licensee provided information indicating that corrective action was being taken, however, further action must be taken to achieve compliance with all areas outlined in the finding. RHRA to confirm compliance by following up with the Licensee or by inspection.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
