

FINAL INSPECTION REPORT
Under the *Retirement Homes Act, 2010*

Inspection Information

Date of Inspection: May 13, 2026

Name of Inspector: Michele Davidson

Inspection Type: Routine Inspection

Licensee: ACC-002938 - Pleasant Valley Rest Home Inc.

Retirement Home: Pleasant Valley Rest Home

License Number: T0455

About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee’s management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home’s Residents’ Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Emergency Plan

RHRA Inspector Findings

During a routine inspection of the retirement home, the inspector reviewed the Licensee's emergency plan records and determined that the Licensee was unable to provide documented evidence that the required test scenarios had been completed. Specifically, there was no evidence of annual testing for missing residents, medical emergencies, violent outbursts, pandemics or epidemics, and a full-building evacuation. As a result, the inspector concluded that the Licensee had not met the requirement under the emergency response plan to test these scenarios at least once every 12 months.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #2: Infection Prevention and Control**RHRA Inspector Findings**

As part of infection prevention and control requirements, the Licensee is required to meet annually with the local public health unit to address health care issues and the reduction of infectious diseases in the home. The inspection found that the Licensee was unable to provide documented evidence that such a meeting had occurred within the required annual timeframe. The absence of this evidence indicates non-compliance with the applicable infection prevention and control requirement.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #3: Resident Record, Assessment, Plan of Care**RHRA Inspector Findings**

A routine inspection was conducted, including a random review of resident records. Based on the records reviewed, the inspector found that some plans of care did not contain documented evidence that residents had been reassessed and that their plans of care had been revised at least every six months. In addition, one newly admitted resident did not have an assessment and plan of care completed within the prescribed timelines. The inspection also identified one plan of care that did not contain documented evidence of the required approvals. These omissions indicate non-compliance with legislative requirements regarding assessments and plans of care.

Outcome

The Licensee submitted a plan to achieve compliance by Friday, June 5, 2026. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #4: Staff Training**RHRA Inspector Findings**

As part of the inspection, staff training records were reviewed to assess compliance with mandatory training requirements. The Licensee was unable to provide documented evidence of ongoing annual retraining for staff. Although prior completion of training had reportedly been confirmed, records demonstrating annual retraining were not available for review. In the absence of sufficient documentation, the inspector determined that the Licensee had not demonstrated compliance with the annual staff training requirements.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.

Additional Finding#1: Falls Prevention**RHRA Inspector Findings**

During the routine inspection, the inspector reviewed records related to falls prevention. The records reviewed did not demonstrate that the Licensee had consistently completed falls risk assessments for all residents, as required by the Licensee's falls prevention policy. This gap in implementation indicates that the Licensee had not fully implemented the policy, creating risk that resident fall hazards may not be identified, monitored, or addressed in a timely manner.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.
