About Routine Inspections

A routine inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. During a routine inspection, an RHRA inspector will walk through the home, speak to residents and staff, observe care services and conditions in the home, and ensure the licensee's management and staff follow mandatory policies and practices designed to protect the welfare of residents.

Following a routine inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home's Residents' Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If the licensee repeatedly does not meet the required standards, RHRA may take further action.

Focus Areas

During a routine inspection, an inspector will focus primarily on a set number of areas which have been identified as related to the health, safety and wellbeing of resident, and may take various actions to determine whether the licensee is compliant with the RHA in relating to the areas. The areas listed in this section are ones which an inspector has identified as non-compliant.

Focus Area #1: Emergency Plan

RHRA Inspector Findings

During a routine inspection, the inspector reviewed the Licensee's records of testing for their emergency plans. The inspector found the testing for situations involving the loss of essential services, and epidemic/pandemic have not been completed annually as required. Additionally, the home failed to keep current arrangements with community agencies who may be involved in responding to an emergency.

Outcome

The Licensee submitted a plan to achieve compliance by Friday July 31, 2026. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #2: Resident Record, Assessment, Plan of Care**RHRA Inspector Findings**

During a routine inspection the inspector reviewed resident plans of care, and interviewed staff and residents. The inspector found that residents with dementia failed to have an interdisciplinary care conference as part of the development of the resident's plan of care. Further, evidence of resident plans of care failed to be updated or revised every 6 months as required. Lastly, reviewed plans of care failed to have the required goals, details and directions for staff to provide care to residents, including those services provided by external care providers.

Outcome

The Licensee submitted a plan to achieve compliance by Friday July 31, 2026. RHRA to confirm compliance by following up with the Licensee or by inspection.

Focus Area #3: Staff Training**RHRA Inspector Findings**

As part of the routine inspection, the inspector reviewed training records and certification records of staff involved in the administration of a drug or other substances. The inspector found that a staff member had not completed the annual training in all aspects of medication administration.

Outcome

The Licensee submitted a plan to achieve compliance by Friday July 31, 2026. RHRA to confirm compliance by following up with the Licensee or by inspection.

Additional Findings

During a routine inspection, an inspector may observe areas of non-compliance that are not related to the standard focus areas. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
