#### About Responsive Inspections

A responsive inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. A responsive inspection is conducted when RHRA receives information that the licensee may have failed to meet the standards of the *Retirement Homes Act, 2010* or its regulations (the “RHA”). An inspection being conducted does not imply that an allegation is substantiated or that a contravention of the RHA has occurred. A licensee is required to report to RHRA if they suspect harm or risk of harm to a resident. During a responsive inspection, an RHRA inspector may observe the operations of the home, interview relevant individuals, review records and other documentation, and determine whether the licensee’s management and staff have followed mandatory policies and practices designed to protect the welfare of residents.

Following a responsive inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home’s Residents’ Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If there is a serious incident or the licensee repeatedly does not meet the required standards, RHRA may take further action.

#### Concern(s)

*During a responsive inspection, an inspector will focus primarily on the concern(s) which prompted the*

*inspection and may take various actions to determine whether the licensee is compliant with the RHA in relation to the concern(s). Any findings of non-compliance identified in relation to these concerns are listed below.*

**Concern #1: CON-10052-Improper or Incompetent Treatment or Care**

**RHRA Inspector Findings**

A report was made to RHRA which included multiple allegations relating to the care and safety of residents. As part of the inspection in response to the report, the inspector reviewed records relating to the resident, relevant policies and interviewed staff and the substitute decision maker. The inspector confirmed that there was a change in care needs and the plan of care was not revised to include assistance with feeding. The inspector also confirmed that the assessment and plan of care were not completed by an Regulated Health Professional despite the resident requiring dementia care and wound care. Additionally, there was no evidence of an interdisciplinary care conference, nor was the SDM involved in the development or approval of the plan of care. The Licensee failed to ensure all requirements of assessments and plans of care were fully complied with.

**Outcome**

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

**Additional Findings**

*During a responsive inspection, an inspector may observe areas of non-compliance that are not related to the concern(s) which prompted the inspection. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.*

**Additional Finding#1: CON-10501-Medication Administration**

**RHRA Inspector Findings**

While conducting this inspection, the inspector made a finding unrelated to the purpose of the inspection. The inspector observed medication administration and confirmed that drugs or other substances were not always stored in a locked and secured medication cart. The Licensee failed to ensure that the drugs or other substances are stored in a medication cart that is locked and secure as prescribed.

**Outcome**

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.
