About Responsive Inspections

A responsive inspection, performed by an RHRA inspector, is a physical inspection of a licensed retirement home. A responsive inspection is conducted when RHRA receives information that the licensee may have failed to meet the standards of the *Retirement Homes Act, 2010* or its regulations (the “RHA”). An inspection being conducted does not imply that an allegation is substantiated or that a contravention of the RHA has occurred. A licensee is required to report to RHRA if they suspect harm or risk of harm to a resident. During a responsive inspection, an RHRA inspector may observe the operations of the home, interview relevant individuals, review records and other documentation, and determine whether the licensee’s management and staff have followed mandatory policies and practices designed to protect the welfare of residents.

Following a responsive inspection, the RHRA inspector prepares a draft inspection report which is sent to the licensee. The draft report may include instances where the licensee has failed to meet the standards of the *RHA*. If included, the licensee can respond to these instances and is strongly encouraged to inform RHRA of its plans to meet the standards of the *RHA*.

Following the draft report, the RHRA inspector prepares this final inspection report, incorporating any response from the licensee with their plans to meet the standards of the *RHA*. The most recent final inspection report must be posted in the home in a visible and easily accessible location. All final inspection reports from the previous two years must also be made available in an easily accessible location in the home. The licensee must provide a copy of this report to the home’s Residents’ Council, if one exists.

In addition to inspection reports, RHRA may provide information to a licensee to encourage improvements of their current practices.

If there is a serious incident or the licensee repeatedly does not meet the required standards, RHRA may take further action.

Concern(s)

During a responsive inspection, an inspector will focus primarily on the concern(s) which prompted the

inspection and may take various actions to determine whether the licensee is compliant with the RHA in relation to the concern(s). Any findings of non-compliance identified in relation to these concerns are listed below.

Concern #1: CON-11085-Complaints

RHRA Inspector Findings

As part of the inspection, the inspector reviewed the Licensee's complaints log and found that the Licensee failed to fully investigate, and document the complainant's concerns and ensure that a response is made to the complainant indicating what the Licensee has done to resolve their complaints, and that there is a complete written record of complaints in the home as required.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Concern #2: CON-9560-Staff Training - Physician, PSWs, and Nursing Staff Qualifications

RHRA Inspector Findings

The inspector reviewed a sample of training records in the areas of Zero Tolerance to Abuse and Neglect, Resident's Bill of Rights, Infection Control, Whistleblower protection, Personal Assistive Service Devices (PASDs), Fire Prevention and Safety, Emergency Plans, Injury Prevention, Complaints, Behaviour Management, and relevant care services. The inspector reviewed not only records for staff recently hired to determine compliance with orientation training, but also a sample of training records for those hired previously to determine compliance with annual training in these areas. The inspector found that the orientation training for new staff was not completed prior to the staff member working in the home.

For the annual training files reviewed, 2 staff had not completed training in each care service offered in the home.

The Licensee failed to ensure that all staff receive the required training at time of hire and annually thereafter, as required.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Concern #3: CON-9561-Security and Safety

RHRA Inspector Findings

As part of the inspection, the inspectors observed that a housekeeping cart was left unlocked and cleaning solutions were left unattended. The Licensee failed to ensure that all hazardous substances used by staff of the home or under their control are labelled properly and are kept inaccessible to residents at all times, as required.

Outcome

The Licensee has demonstrated it has taken corrective action to achieve compliance.

Concern #4: CON-9563-Improper or Incompetent Treatment or Care - Dementia Care

RHRA Inspector Findings

A complaint report was made to RHRA which included multiple allegations relating to the care and safety of a resident. As part of the inspection in response to the report, the inspector made

observations in the home, reviewed records relating to the resident, policies and procedures of the home, and interviewed the SDMs and the staff of the home. The inspector reviewed the Home's Dementia Care Policy and Procedures and found that the document reviewed did not include directions to staff regarding the monitoring the residents of the home for safety and wellbeing as required. The Licensee failed to ensure that their Dementia Care Policy complies with all aspects of the Legislation, as required.

Outcome

The Licensee has advised it has taken corrective action to achieve compliance. RHRA to confirm compliance by following up with the Licensee or by inspection.

Additional Findings

During a responsive inspection, an inspector may observe areas of non-compliance that are not related to the concern(s) which prompted the inspection. In these cases, an inspector may cite the home for these contraventions at the time of this inspection. In addition, an inspector may follow-up on findings of non-compliance from previous inspections. Where the licensee is unable to demonstrate they have come into compliance or maintained compliance, an inspector may cite the home for these repeat contraventions at the time of this inspection.
